# TODU GUAM FOUNDATION

A locally and nationally recognized 501(c)(3) non-profit committed to Getting Guam Healthy One Man, One Woman, and One Child at a time!

# Mission statement:

Providing assistance at no-cost to underserved Guam residents needing access to basic healthcare, education, and support without restrictions.

# Our Story

In 2016, Senator Dennis G. Rodriguez, Jr. and his family opened the doors of the Mobile Medical Clinic to service the needs of our island's uninsured and underserved residents by providing access to basic healthcare services.

With this growing and apparent need, the Todu Guam Foundation was formed in 2017 with a commitment to Getting Guam Healthy One Man, One Woman, and One Child at a time.

# MOBILE CARE CLINIC

Our mobile clinic brings basic and preventive healthcare assistance to the hard-to-reach areas to service the underinsured and uninsured. Services like immunizations, TB skin tests, women's health care, and physical exams come at no cost to the patient.

Patient education is included in every visit, as education and empowerment are at the forefront of the Todu Guam Foundation's mission of **Getting Guam Healthy One Man, One Woman, and One Child at a time!**

## PATIENT NAVIGATION AND FINANCIAL ASSISTANCE

Because we know that sometimes, getting the care you need may require getting necessary documents for application, further financial aid and specialty care, we assist you through our network of providers and community resources.

## HEALTH PREVENTION AND EDUCATION

Living a healthy life starts with knowing what to do to achieve wellness.

Through our “Let’s Talk” health forums and preventive healthcare services, we encourage positive lifestyle health changes.

## CARES MOVEMENT

Mental health is just as much a part of our overall well-being. That's why we don't just focus on the physical health of the people we serve.

Through CARES, we help socially marginalized students and families develop resiliency skills and character strengths for their mental well-being.

## MIND CARE BY TODU GUAM HEALTH + WELLNESS

Capitalizing on the use of innovative technology, the TGF, in late 2022 pursued funding from the United States Department of Agriculture (USDA) to purchase Guam's first Transcranial Magnetic Stimulation (TMS) device. TMS is a treatment technique that uses a magnetic field to influence brain activity. It can treat depression, depression with anxiety, obsessive-compulsive disorder, smoking addiction, and other brain related conditions. It's noninvasive approach can help when other treatment approaches are not effective.
